

Company Profile

MMDon Tech Trading | Reg 2010/100915/23

About MMDon Tech

MMDon Tech Trading is a leading service provider in sales and distribution; import, exports and inspections (unpack/repack; examination).

The company offers services to various industries, such as; mining, agriculture, engineering, and government departments across Africa.

Our team's world-class experience in the industry translates to a reliable service as well as quality products you can count on. We aim at providing excellent services and products to satisfy our clients by giving tailored solutions.

MMDon Tech is a socially responsible company with a focus on making a positive contribution to it's community through job creation, skills and enterprise development which assists in stimulating African economies.

Our mission is to facilitate fast and efficient movement of freight from producer to distributor through collaborating with shipping and logistics companies, cutting down on their operational costs by providing convenient storage spaces for their empty and full containers. By working closely with our customers across all disciplines, we jointly strategize a holistic land side logistics supply chain solution that will create value for your business.

VISION

To be the leading container storage, logistics and distribution company; providing reliable and secure storage facilities, professional customs services, and efficient freight transport and shipping services to facilitate seamless import and export of goods and products for sectors and industries in Africa and beyond.

Service Commitment

MMDon Tech's commitment is to provide excellent client service; ensuring that every client enjoys helpful, efficient and reliable service at all times.

Why Choose Us?

Client-Centricity

We take a centralized account management approach to our client relationships, providing a single contact point, thus ensuring holistic and fulfilling engagement for all the clients.

Customised Solutions & Value

All our services and products are geared at meeting our clients' requirements. We deliver a valuable end-to-end experience by continually improving our processes and ensuring that we offer innovative solutions.

Flexibility

Our solutions and services are developed in such a manner that they can easily be adjusted to meet our customers' needs. Our approach is based on the trust that we have built with our clients, in which our clients can freely express their concerns and needs.

Ongoing Communication

Considering that our area of work is specialised, we ensure that there is ongoing communication between suppliers and clients to address the issues affecting our value chain needs.

We provide our clients with feedback and report to them on the work we are doing for them.
